Edward S. Harkness Eye Institute

2024 BASIC SCIENCE COURSE IN OPHTHALMOLOGY

January 8–February 2, 2024
New York, New York

BSCO 2023 CLASS
Developed by a committee of world-renowned scientists and practicing clinicians, the basic science course in the Edward S. Harkness Eye Institute at the Columbia University Department of Ophthalmology offers residents and vision scientists a deep dive into the most recent scientific advances in Ophthalmology.

The curriculum examines the fundamentals of vision and emphasizes how these basic principles relate to patient care. Since 1941, the Basic Science Course in Ophthalmology has drawn leading experts who are nationally and internationally recognized for their contributions to science. While the focus of the course is resident training, it has also proven useful for the visual sciences community as a whole.
