

2024 Inaugural Awardees

The LHS and Health Justice Research and Training Award

The **EQUIP Center for Learning Health System Science** and the **Dalio Center for Health Justice** are proud to announce the inaugural recipients of our unique cosponsored funding opportunity focused on learning health system (LHS) and health equity research.

Four awardees were selected from a competitive pool of applicants from Columbia and Weill Cornell faculty. Over a 2-year period, awardees will be supported in conducting systemwide research on topics at the intersection of health equity and quality in healthcare. These early career LHS researchers will serve as ambassadors for the growth and development of Columbia, NewYork-Presbyterian, and Weill Cornell Medicine clinician-researchers as emerging leaders in learning health system science.

We congratulate the selected awardees below, as well as all entrants for their thoughtful applications and ideas to advance learning health system research.

COLUMBIA AWARDEES

Syed Hussain, MD, MPH
Assistant Professor of Medicine
Division of Nephrology

Project

Development and Evaluation of an Informatics-Based Approach to Reducing Disparities in Kidney Transplant Evaluation Completion in a Learning Health System
