Developed by an expert program committee of active scientists and practicing clinicians, the basic & clinical science course at the Edward S. Harkness Eye Institute at Columbia University offers residents and vision scientists a deep dive into the most recent scientific advances in Ophthalmology.

The curriculum examines the fundamentals of vision and emphasizes how these basic principles relate to patient care. Since 1941, the Basic & Clinical Science Course in Ophthalmology has drawn leading experts who are globally recognized for their contributions to science. This course provides a solid foundation in ophthalmic fundamentals for both early-career residents and members of the broader visual sciences community, advancing practices and improving patient outcomes.
